MUNICH, 29 AUGUST 2019

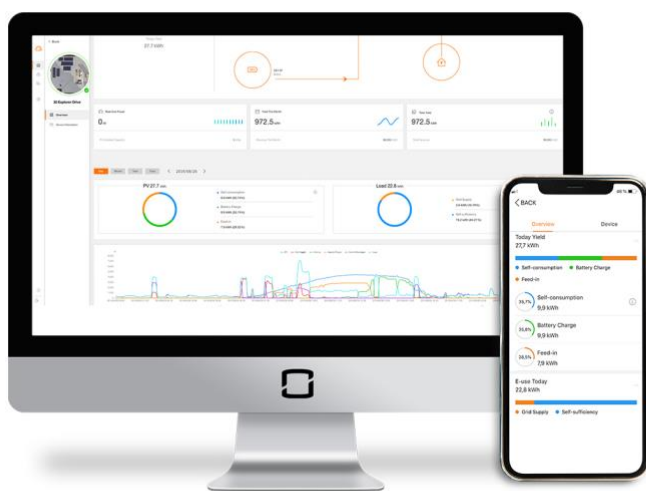

iSolarCloud: ultra-fast commissioning with Sungrow's new monitoring solution

Sungrow, the global leading solar inverter specialist, just launched its new software iSolar-Cloud. The **cloud-based web portal** and **app** is now available. An absolute highlight of the platform is the **easy and hassle-free commissioning process** with the iSolarCloud wizard. It guarantees a smooth and fast configuration of PV plants. A **commissioning report** can be downloaded as pdf and provided to end-users or energy-suppliers.

iSolarCloud enables superior monitoring and comprehensive maintenance through **user-friendly design** and numerous new features like **remote troubleshooting, mass parameter setting or smart reporting**. iSolarCloud is **100 % GDPR compliant** and all data is secured on a European server.

In the future, Sungrow will **invest more in monitoring solutions** and continuously develop the platform further. *"Since more than 20 years Sungrow is an absolute hardware-specialist. With iSolarCloud, we now hit the ground running in software development – a big challenge. But we have set up an **international team of experts** to master it and see huge potential here "*, highlights **Florian Chan, Head of Distribution at Sungrow**.

Download the iSolarCloud App on the **App Store** and on **Google Play**. Or register on **www.isolarcloud.com**.

About Sungrow

With over 87 GW of clean power presently installed worldwide Sungrow Power Supply Co., LTD - short Sungrow - is the global leading solar inverter specialist and the biggest solar inverter manufacturer in the world.

Sungrow was founded in 1997 by Prof. Cao Renxian. His academic background possibly explains Sungrow's focus on research and development of solar technology. With more than 1,000 research and development employees Sungrow runs the largest R&D team in the industry.

As a result, the Sungrow product portfolio offers **solar inverter solutions and energy storage systems for utility-scale, commercial, and residential applications, as well as internationally recognized floating PV plant solutions.**

With a track record in the PV industry spanning more than two decades, Sungrow helped to install solar power installations in more than 60 countries amounting to a global market share of over 15 percent.

Offering a wide range of solutions and services, Sungrow is committed to becoming the global leader of power conversion technology in order to provide clean power to all. Today, tomorrow and beyond.
